

Ensure a Flawless Web Experience™

BrowserHawk® helps ensure your site works properly for every visitor, regardless of their browser and system settings. Discover the power of BrowserHawk today!

With BrowserHawk you will:

- > Increase online sales and conversion rates
- > Slash support and maintenance costs
- > Improve site design & usability

Today's web users have zero tolerance for sites that fail to work properly. Failure rates, however, are soaring because of differences in each user's browser and system settings. That's why you need BrowserHawk.

BrowserHawk makes it easy to build and support web sites that work flawlessly for *every* visitor.

1. Screen: BrowserHawk detects each user's browser type, version, connection speed, screen size, plug-ins, Java, disabled cookies and over 125 properties in all.

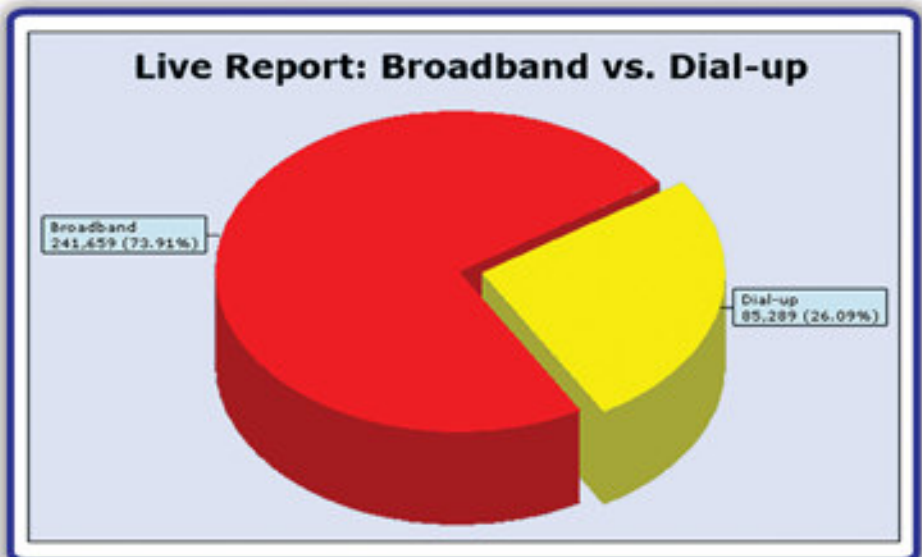

2. Customize: BrowserHawk enables you to customize the web experience to best suit each user, based on their unique browser and system settings.

Now you can deliver rich content to users that support it, while delivering a basic alternative to all others. And users that do not meet your browser requirements can be presented with automated self-help to resolve their issues.

3. Analyze: All screened data is automatically logged along with the actual page load times that each user experiences on your site. This data proves invaluable for troubleshooting and improving your site design and usability.

Summary of your visit			
Description	Median	Average	
Page load time (3 pages with latency & intra)	2.1 sec	2.9 sec	
Latency and Intra details as follows:			
Latency (3 pages)	0.3 sec	1.7 sec	
Intra (4 pages)	0.9 sec	1.0 sec	

Details on your page load times				
Latency	Intra	Total	HitType	Page
0.3	1.8	2.1	Tested	/Default.aspx?bhcp=1
0.2	1.0	1.2	Click	/company/aboutus.aspx
4.7	0.8	5.5	Click	/products/bhawk/reports/data/colorscreen.asp
-	0.2	-	Cached	/company/aboutus.aspx
