

CountryHawk™ for Geolocation

CountryHawk instantly and accurately identifies your visitor's country of origin in real-time as they enter your site. Geolocation has never been easier!

The CountryHawk advantage:

- > Reduce credit card fraud and chargebacks
- > Show region-specific pricing & currency
- > Route your Internet traffic efficiently

CountryHawk®

continued on back...

CountryHawk instantly and accurately identifies the country of origin of every visitor to your web site in real-time. This enables you to provide a localized presence to your global audience.

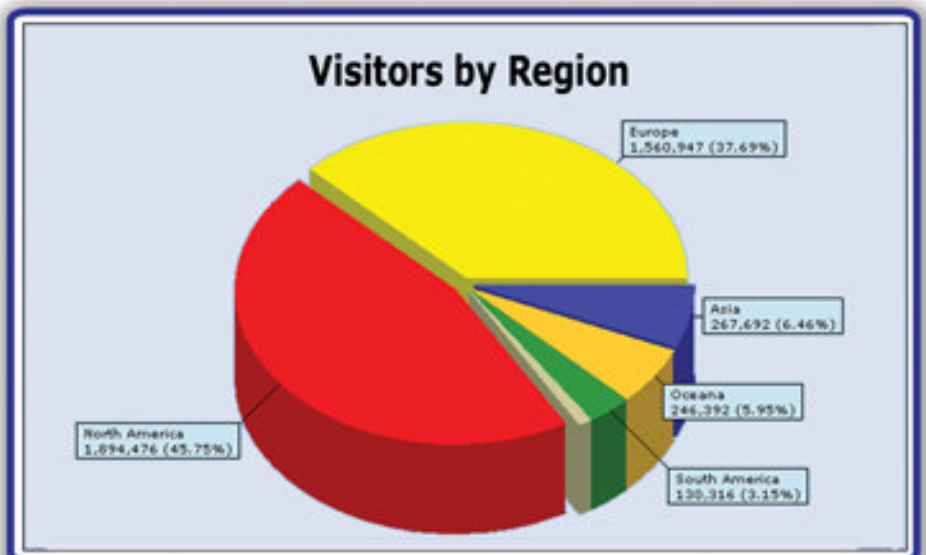

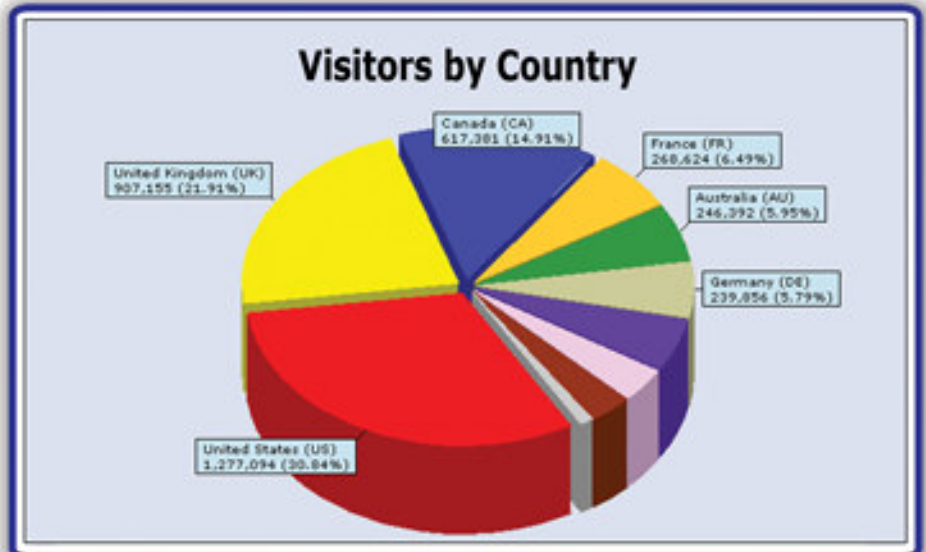

Discover why today's leading enterprises choose CountryHawk for their Geolocation needs.

Instant detection: CountryHawk instantly identifies the country of origin of every web visitor. Over 240 countries and 4 billion IP addresses are covered with over 98% accuracy.

Custom content: Use CountryHawk to deliver region-specific pricing, detect fraudulent transactions, route traffic most efficiently, and much more.

Accurate stats: CountryHawk automatically tracks total page requests made by country and region in real-time. These statistics are more accurate than traditional web analytic tools.

Enterprise-class scalability: CountryHawk uses an optimized memory-resident database that runs on your local server. With no dependencies on any outside servers your applications stay fast and secure.
